1 Introduction

AlienForm (A4M) is an innovative, decentralized token project that stands at the forefront of transparency, community-led governance, honesty and accountability. With a steadfast commitment to these principles, AlienForm aims to build trust and credibility within the crypto space. This is achieved through a combination of measures, including the use of multi-signature (multi-sig) wallets and the regular publication of monthly financial reports.

2 Problem Statement

The crypto space faces significant challenges regarding trust and integrity, which impacts its participants and hinders the industry's growth. Several issues contribute to the problem, including:

1. **Token Scams and Rug Pulls:** Deceptive actors exploit the decentralized nature of cryptocurrencies by creating tokens with false promises or innovative claims. Investors fall victim to these scams known as “rug pulls”, where the scammers swiftly drain liquidity and exit the project, leaving investors with tokens that cannot be sold.
2. **Slow Rug Pulls:** Scammers employ prolonged deception tactics, gradually extracting value from a project over an extended period. These deceptive practices mislead participants, who continue to invest while scammers covertly drain the project's value. When the exit occurs, it is sudden and substantial, resulting in significant financial losses for unsuspecting investors.
3. **Fake Projects and Team Members:** Fraudsters create seemingly legitimate projects, complete with enticing websites, whitepapers, and social media presence. However, these projects often lack substance, with inflated claims and fabricated team members. This deceit erodes trust and misleads investors, ultimately leading to financial losses and a tarnished reputation for legitimate projects.
4. **“Pump-and-Dump” Schemes:** Scammers artificially inflate the price of a token through coordinated buys and promotions, attracting unsuspecting investors. Once the price reaches its peak, the scammers sell off their holdings, causing the token's value to plummet. This manipulative practice leads to significant financial losses for those who bought in at the inflated price.

These trust-related issues pose a significant risk to participants in the crypto space. They erode trust, cause financial losses, and hinder the broader adoption of cryptocurrencies. Addressing these challenges is crucial to building a more trustworthy and resilient crypto ecosystem that safeguards participants' interests and fosters sustainable growth and innovation.

3 Solution

Transparency lies at the core of AlienForm's values. The project is dedicated to providing its community members with complete visibility into its operations and financial activities. As a community-led initiative, AlienForm empowers its participants by involving them in the decision-making process. Elected community representatives form the Board of Directors (B of D), ensuring that all significant choices are made collectively and in the best interest of the community as a whole.

To enhance security and protect user funds, AlienForm utilizes multi-sig wallets. These wallets require the consensus and approval of multiple individuals to authorize transactions. By implementing this decentralized control mechanism, AlienForm ensures that no single person holds full control over the project's assets, mitigating the risk of fraudulent or unauthorized actions. The current holders of the Multi-Sig-Wallets are: Wolf, Mary-Jane, Stone, Doug and Drew.

In addition to transparency and security, AlienForm recognizes the importance of accountability. The project consistently delivers monthly financial reports to the community, offering a comprehensive breakdown of all expenses and transactions. These reports provide community members with a clear understanding of how funds are allocated and utilized, fostering trust and reinforcing AlienForm's commitment to responsible financial management.

By combining 100% transparency, community-led governance, regular financial reporting, and the use of multi-sig wallets, AlienForm sets a new standard for trust and integrity in the crypto space. The project actively promotes openness, inclusivity, and security, empowering its community members and establishing a foundation for sustainable growth and long-term success.

4 Governance and Community

AlienForm is built upon a governance model that places the power and decision-making authority in the hands of its community members. The project recognizes that the collective wisdom and expertise of the community can drive its success and ensure that decisions align with the interests of all stakeholders. The following elements highlight AlienForm's commitment to community governance:

- Community-Led Decision Making: In the AlienForm ecosystem, all important decisions are made collectively by the community. This includes decisions regarding strategic development and partnerships, budget allocations, and other critical matters that impact the project's direction. By involving the community in decision-making, AlienForm ensures that the project evolves in a way that reflects the interests and needs of its stakeholders.

- Board of Community Members: AlienForm's Board of Directors works collaboratively to ensure transparency, inclusivity, and fairness in the decision-making process. Additionally, two trusted advisors (Doug and Drew) provide valuable guidance to the board.

Each member of the board can be voted out of their position at any time, either by fellow board members or community consensus, if their quality of performance is not in accordance with the project's ethical values, or the welfare of the community and progress of the project is put at risk by their actions.

5 Team and Advisors

Board of Directors: The board comprises individuals with diverse backgrounds and expertise to ensure a well-rounded approach to governance. The current board members are:

- Stone: Chief Executive Officer (CEO) – Stone has been self-employed for 20 years, which has allowed her to gain a lot of experience in the business world. As our Chief Executive Officer Stone serves as the lead representative of the project. She frequently hosts and participates in Ask Me Anything (AMA) sessions to keep the community informed at all times. Stone always keeps the overview of the project.

- Drew: Chief Operating Officer (COO) - The survival of this project would not have been possible if not for the efforts of Drew. He was able to convince Cliff Fettner the former CEO, to pass over the contract and he ensured it was redirected into a community driven project in March of 2023. Drew's vision of community first for this project was then put into motion, a Board of Directors was formed and is comprised of vetted, qualified, trustworthy long-time community members. Alien Form was then founded after the community voted to rebrand and relaunch the project. Drew is boasting over 25 years of invaluable corporate expertise. He oversees the day-to-day operations, ensuring streamlined processes, efficient resource allocation, and optimal organizational performance. Drew's visionary leadership and extensive experience make him an indispensable asset to AlienForm's executive team.

- Mr. T: Chief Relationship Officer (CRO) - Mr. T has many years of experience in tech recruitment, having built teams globally at a senior level, and is a business development gun. As our Chief Relationship Officer Mr. T is responsible for seeking out and maintaining strong relationships with the project's community and partners. He actively searches for opportunities and invitations to gatherings that will help spread awareness and positivity.

- Mary Jane: Chief Financial Officer (CFO) - Mary Jane is a very successful businesswoman in real life. As our Chief Financials Officer Mary Jane manages the financial aspects of the project, including budgeting, financial reporting, and strategic financial planning.

- Wolf: Chief Blockchain Officer (CBO) – Wolf has a vast understanding and years of experience with digital ledger technology. As our Chief digital ledger Officer he closely monitors digital ledger activity to ensure AlienForm's A4M digital assets contracts and utility contracts are not manipulated / exploited. Wolf provides technical assistance and knowledge of digital ledger technology to the community and other members of the board.

- Phoenix: Chief Creative Officer (CCO) - As our Chief Creative Officer he developed AlienForm's Logo, oversees the creation and management of AlienForm's creative content and is ensuring a consistent and engaging brand presence.

- KD: Chief Education Officer (CEDO) – KD is our Chief Educations Officer where he oversees AlienForm University (A4MU). With over 30 years of experience as a market trader and educator, KD brings a wealth of knowledge to his role. His passion for teaching is evident in his innovative approach, where he combines traditional educational methods with cutting-edge technology.

- Advisors: AlienForm benefits from the guidance of trusted advisors who bring valuable insights and experience to the project. The advisors contribute to strategic decision-making and provide mentorship to the team. The advisors supporting AlienForm is:

- Doug: Doug is an expert in Decentralized Finance (crypto) and cyber security, Doug supported Drew in the project take over and provides valuable advice for the Board of Directors to make safe and sound decisions. Doug comes to us with over 15 years of experience in IT, Network, and Enterprise security. You can also find him routinely holding security training and crypto wallet (Especially cold wallet) education for the community.

The combined expertise of the team and advisors ensures that AlienForm has access to a diverse range of perspectives, skills, and experiences necessary for the project's success.

6 Utilities

In addition to addressing the trust-related challenges, AlienForm offers a range of utilities that bring value and innovation to the crypto space. These utilities include:

6.1 AlienForm University (A4MU)

In the ever-evolving landscape of cryptocurrency, knowledge is power. AlienForm University (A4MU) bridges the gap between novice and seasoned traders, providing a dynamic learning environment where users can cultivate the skills necessary to navigate the complex world of crypto trading. Our commitment extends beyond mere theoretical understanding, as A4MU employs a multifaceted approach encompassing lessons, quizzes, online content, and live trading videos.

6.1.1 Key features

Comprehensive Curriculum

A4MU boasts an extensive curriculum covering a wide spectrum of topics, including equity management, technical patterns, and a variety of trading strategies. The modular structure ensures a tailored learning experience for each student, accommodating various skill levels.

Innovative Teaching Methods

Our platform leverages cutting-edge educational methodologies to deliver engaging lessons. From interactive quizzes that reinforce key concepts to live trading videos providing real-world insights, A4MU ensures an immersive and effective learning journey.

Accessible to All Ages

A4MU is committed to inclusivity, offering educational resources suitable for individuals of all ages. Whether you're a seasoned trader or a young enthusiast eager to learn, A4MU provides a platform where knowledge knows no age limits.

Live Trading Demonstrations

A4MU takes education a step further by integrating live trading demonstrations. Users have the opportunity to witness real-time market analyses and strategies in action, fostering a deeper understanding of the dynamics of cryptocurrency trading.

6.1.2 Vision

A4MU aspires to cultivate the next generation of crypto-savvy individuals, equipping them with the skills and knowledge needed to navigate the rapidly evolving digital asset landscape. By offering a diverse and comprehensive educational experience, A4MU aims to empower users to confidently participate in the crypto markets, contributing to the growth and sustainability of the Alien Form ecosystem.

6.1.3 Conclusion

In the pursuit of fostering financial literacy and empowering individuals to thrive in the crypto markets, A4MU stands as a beacon of innovation and education. As an integral component of the AlienForm Crypto Project, A4MU not only imparts knowledge but also cultivates a community of informed and skilled traders, shaping the future of the crypto space one learner at a time.

AlienForm University is an educational platform only. No advice is given on buying or selling cryptocurrencies or other tradable currencies such as stocks.

6.1.4 Prices and processing

Subscription Fee

Our courses for beginners and basic training are free of charge and anyone interested can take part. The price for accessing our advanced courses is a one-time fee of 800 USD.**

Payment Process

Upon completion of the \$800 payment, students will receive access to our expanded course catalog. Payment must be made via USDT or USDC to our Crypto Wallet. Credit card payments or bank transfers are not accepted.

NFT Student ID

As a sign of enrollment, the student will receive a unique, non-forgeable token (NFT) that serves as a student ID. This NFT, which is stored in the student's digital wallet, serves as proof of eligibility to participate in our advanced courses.

***Note utility subscription prices are subject to change in the future*

Course Access

Once the student has purchased their NFT Student ID, the student can connect to our site using Wallet Connect to access all advanced courses.

6.1.5 Learn to earn

When students complete courses and this has been confirmed by the instructor, the students receive a reward in the form of USDT or USDC in their wallet. The amount of the reward will be individual and is only intended for students who have completed courses.

6.2 AlienForm Trade Probe

AlienForm's Trade Probe is an advanced trading tool designed to cater to both conservative and aggressive traders. Leveraging a sophisticated algorithm, this tool pulls data from multiple sources, including market indicators, news sentiment, and historical trends, to generate insightful buy and sell signals.

6.2.1 Key Features:

Data Aggregation: AlienForm's Trade Probe compiles information from diverse sources, providing a comprehensive view of the market landscape.

Algorithmic Analysis: The platform utilizes a powerful algorithm to process and interpret the collected data. This algorithm takes into account various factors, such as technical indicators, market trends, and sentiment analysis.

Signal Customization: Traders can tailor the tool to their risk tolerance and trading style. The platform generates signals for both conservative and aggressive approaches, allowing users to make decisions aligned with their preferences.

Custom Updates: AlienForm's Trade Probe produces signal updates in 15M, 30M, 1H, 2H, 4H, Daily and Weekly intervals, allowing traders to tailor their strategies to fit their individual schedules.

User-Friendly Interface: The tool features an intuitive interface, making it accessible for both novice and experienced traders. The clear presentation of data and signals enhances the overall user experience.

Risk Management: The platform includes risk management features, providing users with insights into potential downsides and helping them make informed decisions to mitigate risks.

Backtesting: Traders can evaluate the tool's effectiveness by employing backtesting capabilities, allowing them to assess historical performance and refine their strategies.

6.3 AlienForm Portfolio Manager

AlienForm Portfolio Manager is a cutting-edge platform tailored for cryptocurrency investors, offering a comprehensive suite of tools and features to optimize portfolio management in the dynamic crypto space.

Token Overview

Users can effortlessly access a detailed overview of all listed tokens, including real-time prices, market capitalization, trading volume, and price charts sourced via CoinMarketCap API integration. This allows investors to stay informed about the latest developments in the crypto market and make data-driven investment decisions.

Portfolio Tracking

AlienForm enables users to create and manage their crypto portfolios with ease. By inputting transaction details or connecting their wallets, investors can track their holdings, monitor portfolio performance, and gain insights into asset allocation and diversification.

Watch Lists

Investors can curate personalized watch lists to keep a close eye on specific tokens of interest. Whether monitoring potential investment opportunities or tracking market trends, users can customize their watch lists to suit their individual preferences and investment strategies.

Transaction History

The platform provides a comprehensive transaction history feature, allowing users to record buy, sell, and trade activities. By documenting transactions, investors can accurately assess their profits and losses, track investment performance over time, and evaluate the success of their trading strategies.

Wallet Integration

For enhanced convenience and security, AlienForm offers wallet integration, enabling users to connect their cryptocurrency wallets directly to the platform. This seamless integration streamlines portfolio management processes and provides users with real-time access to their holdings without compromising on security.

Expense Management

Users can also manage gas fees associated with transactions on the platform. AlienForm allows users to stretch out the expenses related to gas fees, ensuring that users can effectively manage their transaction costs while engaging in portfolio management activities.

6.3.1 Token Utility (A4M)

To access certain premium features such as wallet integration, users are required to hold a specified number of AlienForm tokens (A4M). This incentivizes token ownership and fosters community engagement while ensuring access to advanced functionalities for active participants within the AlienForm ecosystem.

6.4 AlienForm Bridge

The AlienForm Bridge is a solution that enables seamless and rapid transfers between different blockchains. With this bridge, users can move supported tokens (currently A4M only) across various blockchain networks, or trade one asset for another in a matter of seconds. The advantages of the AlienForm Bridge include:

- Speed and Efficiency: The bridge ensures near-instantaneous transfers, providing users with a swift and efficient cross-chain transaction experience.
- Interoperability: By facilitating seamless transfers between different blockchains, the AlienForm Bridge promotes interoperability, allowing users to leverage the strengths of various blockchain networks.

7 Tokenomics

	Buy Tax 3%	Sell Tax 3%	Transfer Tax 1%
Liquidity Pool	1%	1%	0%
Marketing Wallet	1%	1%	1%
Miscellaneous Wallet	1%	1%	0%
Burn	0%	0%	0%

Note these values may change periodically depending on the needs of the project and / or community, or during promotional events
